## **Recommendation letter**

The **LS Mtron** company started its activity in 1969 and from the very beginning it has been designing and producing plastic injection molding machines. Since its inception, we have developed a complete line of hydraulic, electric and hybrid injection molding machines, with both double-plate and toggle clamping systems and clamping forces ranging from 25 tons to 4000 tons. Our state-of-the-art technology has provided us with a global reputation, as evidenced by the fact that 60% of our entire production is exported to 40 countries around the world, including Japan, which is a leader in creating modern technologies.

**POWER SOLUTIONS** has carried out an excellent relocation of 80-100 tons of injection molding machines for our customers throughout Poland.

They are seen as very cooperative and flexible. They brought their own ideas and optimization opportunities. The quality of the work was assessed as very good in line with the economic, efficient and time goals.

We look forward to continuing our partnership with the company in the future.

We recommend cooperation with **POWER SOLUTIONS** company.

Yours sincerely

*Pyung Sik Kim*

Branch Office Resident  
European Regional Manager
